

The Global Identity Foundation

A single global identity for humanity

Vision

A safer world where all entities¹ can interact using a single digital identity; that provides them enhanced security and privacy, and which is completely under their control; enabling an eco-system of assured trust for all digital transactions.

Note 1: An entity is a person, device, organization, code or an agent; “Interaction” in this context also includes interaction with digital services provided by any entity.

The Global Identity Foundation

A single global identity for humanity

Mission

- To facilitate the development and implementation of a global identity solution;
 - That is truly privacy enhancing
 - That scales globally
 - That supports all entities, not just people, in a single identity eco-system
 - That is globally accepted by all parties who need digital identity with a known level of trust.
